

# Nutritional support for the Immune System

Cell-mediated immunity relies on T-Cells to regulate other defensive cells such as macrophages and neutrophils, while humoral immune responses rely on antibodies and the complement system, both of which impact cold and flu. Recent advances emphasize that specific nutrients and natural compounds are critically important for both humoral and cell mediated immune responses.

Biotics Research Corporation offers specific products to support a healthy immune response, products which may be appropriate for your patient's individual needs.

- **Bio-Immunozyne Forte™** (broad spectrum nutritional support)
- **IAG™** (Arabinogalactans for support of the complement system)
- **Bio-C Plus 1000™** (mixed ascorbates)
- **Cytozyme-THY™** (thymus specific support for immune function)
- **UltraVir-X™** (unique botanical support for the immune system)
- **Neutrophil Plus®** (special support for cell-mediated responses)
- **Bio-FCTS™** (fortified bioflavonoid support)
- **Bio-AE-Mulsion Forte®** (emulsified, high potency vitamin A)
- **Bio-D-Mulsion Forte®** (emulsified, high potency vitamin D3)

**It's that season again! Be prepared with effective, targeted support from Biotics Research.**
